A 92.9 6 HATCHERY PRODUCTION OCTOBER 1960

Chick Production 2010

Commercial hatcheries produced 157, 469,000 chicks in October, up 16 percent from October 1959. Production of broiler-type chicks totaled 141,251,000, compared with 121,660,000 in October last year--an increase of 16 percent. Broiler output during January through October totaled 1,660,738,000, compared with 1,572,871,000 during these months in 1959--an increase of 6 percent. Eggs in incubators November 1, 1960, indicate that the hatch of broiler-type chicks will continue larger than a year earlier.

Production of egg-type chicks during October totaled 16,218,000, up 13 percent from the hatch in October 1959. Production during the first 10 months of 1960 totaled 447,831,000, compared with 513,189,000 during these months in 1959—a decrease of 13 percent. A larger November hatch of egg-type chicks than a year ago is in prospect, as the number of eggs in incubators on November 1 was 14 percent larger than on November 1, 1959.

Poult Production

Heavy white breed poults hatched during October totaled 1,032,000, up 20 percent from the hatch in October 1959. The hatch of other heavy breeds (mostly bronze) of 282,000 was about two and one-half times as large as the seasonally light hatch of 114,000 in October 1959. For the year to date, January through October, the hatch of heavy white breeds of 21,148,000 was up 15 percent from the same period in 1959. The hatch of 54,139,000 other heavy breed poults, January through October 1960, was up 5 percent from this period in 1959. Output of light breed poults in October totaled 442,000, up 39 percent from October 1959. The cumulative hatch of light breed poults, January through October 1960, was down 31 percent from a year earlier.

Total hatch of all breeds during the first 10 months of 1960 was 1 percent more than during this period in 1959.

Turkey eggs in incubators November 1, indicate that the hatch of turkey poults all breeds will be larger than in November 1959.
